REALKINETIC

YOUR POTENTIAL REALIZED

1. Pass a context object to  
basically everything

```
type Context =  
  { user_id :: String  
    , account_id :: String  
    , trace_id :: String  
    , request_id :: String  
    , parent_id :: Maybe String  
  }
```

1. Pass a context object to  
basically everything
