A system and method that efficiently, robustly, and flexibly permits large scale distributed asynchronous calculations in a networked environment, where the number of users entering data is large, the number of variables and equations are large and can comprise long and/or wide dependency chains, and data integrity is important

Or ... a distributed calculation engine

REALKINETIC
YOUR POTENTIAL REALIZED

A system and method that efficiently, robustly, and flexibly permits large scale distributed asynchronous calculations in a networked environment, where the number of users entering data is large, the number of variables and equations are large and can comprise long and/or wide dependency chains, and data integrity is important
